DESCRIPTORS: *Cigarettes, *Smokes, *Tobacco, Urban areas, Rural areas, Behavior, Switzerland.

Investigations were carried out on smoking habits of a rural population in Switzerland. The data from 1635 adult persons in a community near Zurich, showed 65.7% non-smoking men and 96.3% non-smoking women. During the age period of highest tobacco consumption 38.9% of the men and 95.2% of the women were non-smokers. The rate of non-smokers is, in Swiss rural districts, higher than in towns, in farmers (53%)

The increase of gaseous density under pressure raises viscous resistance in the respiratory passages. Thus effort of the respiratory muscles is accentuated. Through too great respiratory effort the ventilation will be restrained. Hypoventilation leads to a retention of carbon dioxide. The symptoms of the so-called rapture of the deep are, in fact, consequences of hypercapnia and of acclitic respiration. The increase in partial pressure of oxygen favors the tendency to hypo-
